

# Emergency Response Vehicle

**Nearly one billion people in the world today lack a source of clean, safe drinking water**

The Alpine Falls Emergency Response Vehicles (ERVs) will provide a naturally clean and stable water source onsite in cases of emergency and to parts of the world without access to a clean water source.

In areas where clean water is unavailable, and in cases of emergency response following disasters, the ERV units will tap potable and non-potable water sources and provide naturally clean and stable 10+pH high alkaline drinking water in volume to support entire communities.

**Worldwide, 1 out of every 5 deaths of children under 5 is due to a water-related disease**

## Emergency Response Project

Managed by:  
**Dwayne Lynn**

**ALPINE FALLS**  
alpinefallsmarketing.com/ervproject

Every 8 seconds, a child dies from drinking dirty water

Access to clean and safe water prevents disease and saves lives
